RE: Permit 30-126 Condition F10 AQD #17 Stack Testing

Dear Dan:

The purpose of this letter is to notify you of upcoming stack testing at Solvay Chemicals' Green River facility. Condition F10 of Permit 30-126 requires annual testing to assess compliance with the NO_x emission limit on the "A" and "B" Calciners, AQD #17. This testing will be conducted on or about August 23, 2004. EPA Reference Methods 1-4 and 7E will be utilized, without deviation.

If you have any questions, feel free to contact me at (307) 872-6571.

Respectfully submitted,

Dolly A. Potter
